40% pay hike

Course content is compact and easy to study. I was impressed by work of support team and mentors. When I stuck at a problem, I send a message to a support team and they respond immediately as if they wait for my message.

I recommend Coding Invaders course to every person who have serious intention to start a career in IT, because here you will get end-to-end support to fulfil your goal

Yes....its best institute to learn data analytics. At the beginning of course I was doubtful will I be able to do course as I m a non technical , they taught everyone from scratch ,adding to that mentors and coordinators helped me and motivated me. Course is designed perfectly. If a person needs any assistance, mentors are always active to help. Overall I m really satisfied that I chose coding invaders.

Yes, it is best institute to do data analytics

I enrolled for the Data Analyst course in coding invaders. The lectures were quite student friendly and the faculty here is amazing. They helps on WhatsApp and on slack. One on one support form mentors is always there, we can connect with the mentors any time for simplest doubt also, mentors are supportive and soft spoken. The Curriculum is designed to be beginner-friendly. There are assignments, projects after each module for practical understanding.
